Merlin® Security +2.0 Accessories

Visor/Wall Remote

Experience the convenience of a versatile spare remote. Operate up to three doors or gates with one remote that can be fitted to a car visor or in the house.

Available in 1 or 3 button versions, visor clip included.

Model: E943M (3 Button)

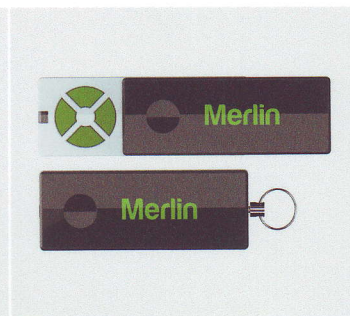

Model: E940M (1 Button)

3 Mini Button Remote

Key ring remote transmitters are small and convenient with the ability to operate up to three doors or gates from the one unit. A must have for every set of keys in the house.

Model: E954M

4 Button Slider Remote

Key ring remote transmitters are small and convenient with the ability to operate up to four doors or gates from the one unit. A must have for every set of keys in the house.

Slide cover protects buttons from accidentally being pressed. Simply slide back to expose buttons.

Model: E950M

Wireless Wall Button

A popular option for homes with internal access to the garage. The remote wall button can be placed in a suitable location in your home or garage. There is no wiring and it can open up to two garage doors.

Model: E138M
(rectangle button)

Model: E128M
(circle button)

The Protector System™

Safety beam sensors.

The best protection for your family and property, the beam prevents the door from closing when there is obstruction in the doorway this ensures even if you don't see the door close you know nothing can be trapped under the door. The sensors are also required to activate the timer to close function on your opener.

Model: C77

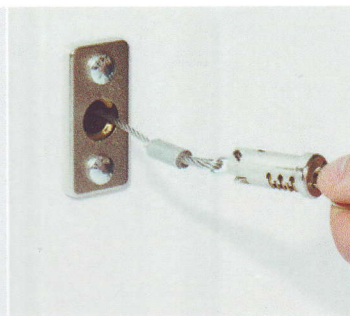

Wireless Remote Keypad

Keyless entry via four digit code access.

The security keypad can be programmed with up to twelve user codes and has the option for temporary codes that last for as many hours or door openings as you select.

Now you can have keyless entry to your home with security. It is perfect for the family, trades people, or even just going for a walk. Now you can leave your keys at home with the peace of mind that your home is secure.

Model: E840M

Key Operated Manual Release

Designed for garages that don't have a second access point. The key operated lock enables you to disengage the operator from the door from outside the garage when there is no power or a remote is not available.

Model: DMK1 - Roller Door

Model: CM1702

- Whisper Drive

Model: E1702M

- Tiltmaster & PowerAce

Open Door Monitor

Wireless open door monitor and sensor. You will always know when the garage door is open with a garage door monitor

Model: CLDM1ANZ

Second sensor: CLDM2-02
